Subject Index For Volume 22

Absorption
of furosemide in congestive heart failure 171
Acetate
role in myocardial depression during hemodialysis 653
Acid mucopolysaccharides
in calcium oxalate nephrolithiasis (abst) 95
Acidification
in in vitro perfused renal tubule 507
Acidosis
acute lactic *a.* in the dog (abst) 212
Adenosine
role in tubuloglomerular feedback S-136
Adenosine triphosphate
postischemic infusion with magnesium chloride ... 13
Adenylate kinase
relationship to renin release S-73
Adrenergic dysfunction
in hypotensive hemodialysis patients (abst) 214
Adrenoceptors
juxtaglomerular in regulation of renin release (abst) 98
Adriamycin
proteinuria induced by (abst) 411
Albuminemia
plasma oncotic pressure in (abst) 325
Albuminuria
in minimal change nephropathy 677
treated with protamine sulfate 127
Aldosterone
low-*a.* hypertension and abnormal cortisol metabolism (abst) 409
Alkalinizing agent
effects on cardiovascular response in dialysis (abst) 98
Alkalosis
acute lactic *a.* in dogs (abst) 212
hypokalemic, low-renin hypertension in (abst) 409
Allograft, renal (*also see* Transplantation)
effects of cyclosporin A on (abst) 97
rejections treated with rabbit anti-human thymocyte globulin (abst) 409
Alport syndrome (abst) 98
Aluminum
influence on calcium and parathyroid hormone in dialysis (abst) 583
Amidolytic activity
used to estimate renal kallikrein 697
Amino acid supplement
long-term effects of a new ketoacid 48
Aminopeptidase A
in glomerulus and juxtaglomerular apparatus of rat and mouse S-44
Amphibians
tubuloglomerular feedback in S-185
Amphotericin B
role in nephrotoxicity 626
Anaphylactoid purpura nephritis
and transplantation (abst) 326
Anaphylaxis
in hemodialysis (abst) 326
Androgens
response to *a.* in renal failure 383
Anemia
microangiopathic hemolytic, and renal failure (abst) 327
treated with androgens 383
Angiotensin
diuretic and antidiuretics in teleosts S-185
Angiotensin II
cardiovascular response to 297
coexisting with renin in human juxtaglomerular epithelioid cells S-30
effects on adenosine to decrease GFR S-136
juxtaglomerular formation of S-49
role as an intrarenal hormone in rat kidney S-78
role in release of renin in circulation S-63
Angiotensin-renin system
effects on tubuloglomerular feedback in the rat S-114
immunocytochemistry of, in mice, rats, and tree shrews S-33
Angiotensinase A
in the glomerulus, histochemistry of S-44
Angiotensinogen
localization of, in rat kidney S-33
Anion
and cation transport in isolated segments of proximal tubules 519
divalent, transport in isolated renal tubules 498
Antibody, anti-DNA
in kidney in systemic lupus erythematosus 671
Antibody, cytotoxic
after renal transplantation (abst) 217
effect of transfusion program on (abst) 218
Antidiuretic hormone
effects on mammalian cortical collecting ducts 526
regulator of water permeability of apical plasma membranes 526
Antigens
cationized, interaction with GBM 27
HBs and Hbe, in nephrotic syndrome in secondary syphilis (abst) 327
HLA-DR4, associated with IgA nephropathy 377
localization of HLA-ABC and DR in transplantation (abst) 217
renal, tubular in glomerulonephritis (abst) 409
Antihypertensive agents
effects in experimental renal hypertension S-12
Antiserum
with aprotinin, inhibits kallikrein 331
Aprotinin
in study of renal function (abst) 324
with antiserum, inhibits kallikrein 331
Arginine vasopressin
effects on connecting tubules 465
Autoregulation
renal, frequency response of *r. a.* of GFR S-165
responses, characteristics of S-157

Autotransplants
renal, in sheep 309
Azathioprine
effects on kidney transplant recipients (abst) 410
Azosemide
effects on peritoneal transport (abst) 97

Basolateral membrane
kallikrein and prekallikrein of 331
Bicarbonate dialysate
suggested for use in acute hemodialysis 653
Bone perfusion
in study of calcium 348
Brushborder membrane vesicles
affected by metabolic acidosis 225
effects on transport of glutamic acid in the rat 240

Calcitonin
effects on distal convoluted tubule 465
levels in hemodialysis patients (abst) 216
Calcium
action of phosphorus on release of 348
affected by aluminum in dialysis (abst) 583
effects in release of renin S-73
in microperfusion of loop of Henle 634
intracellular, in tubuloglomerular feedback signals S-97
ionized, in hyperparathyroidism 662
metabolism in nephrotic syndrome (abst) 324
metabolism in primary hyperparathyroidism postparathyroidectomy (abst) 95
response to PTH with phosphorus 21
transport in distal convoluted, connecting, and cortical collecting renal tubules 492
Calcium oxalate
mixed, pathogenesis and clinical course of 366
nephrolithiasis, acid mucopolysaccharides in (abst) 95
Calciuria
in chronic metabolic acidosis 264
Cannulation
techniques for acute and chronic 75
Captopril
effects on
hypertension (abst) 98
hypertensive rats S-198
tubuloglomerular feedback S-114
treatment in nephrotic syndrome (abst) 220
Cardiovascular response
pressure response to norepinephrine 297
to hemofiltration and hemodialysis (abst) 215
Cations
and organic anion transport in isolated segments of proximal tubules 519
divalent, transport in isolated renal tubules 492
Charge
glomerular, and urinary protein excretion in rat .. 127
Chemoprophylaxis
treatment in children with severe vesico-ureteric reflux (abst) 583
Chemotherapy
effects on tubular necrosis with chronic renal failure (abst) 324
treatment of acute lymphoblastic leukemia (abst). 325
Circulation
release of renin in S-63

Cisplatin
treatment of tubular necrosis (abst) 324
Citric acid
3-phosphocitric acid in prevention of uremia 36
Clearance
glomerular in immune complex glomerulonephritis 8
peritoneal *c.* of PTH (abst) 216
Closed loop mode
in study of renal autoregulation S-173
in tubuloglomerular feedback mechanism S-193
Coagulation tests
value in acute renal failure (abst) 326
Collecting ducts
in prostaglandin synthesis during volume expansion 1
papillary, ion, water, and solute transport in 485
water movement across mammalian cortical *c. d.* 526
Complement
in C3 deposition, mesangial, in glomerulonephritis (abst) 213
Computerized tomography
brain morphodensitometrical analysis in endstage renal disease and dialysis (abst) 97
Concanavalin A
in minimal change glomerulopathy (abst) 410
in transport of glutamic acid 240
Coronary risk factors
in hemodialysis-associated ischemic heart disease 304
Corticoids
prednisone effects on renal transplantation (abst). 218
Cortisol metabolism
abnormal, in low-renin hypertension (abst) 409
Countercurrent multiplication system
used in limbs of Henle's loop 449
Creatinine
ratio with plasma urea in renal failure (abst) 220
Cryoglobulinemia
treated with plasmapheresis (abst) 324
Cuprophan membrane
effect in IgE-dependent anaphylaxis (abst) 326
Cyclic AMP
ovarian, in experimental uremia 272
Cyclosporin A
effects on renal allograft patients (abst) 97
treatment of acute serum sickness nephritis (abst) 582

Denervation
acute, effects on tubuloglomerular feedback S-129
Deoxycorticosterone acetate
effects on papillary collecting ducts 485
Deposits
immunological tubulo-interstitial *d.* in IgA nephropathy 184
isolated mesangial C3 in glomerulonephritis (abst) 213
subepithelial 27
Dialysis (*also see* Hemodialysis)
brain morphodensitometrical analysis of patients on (abst) 97
continuous ambulatory peritoneal dialysis (CAPD)
clearance of PTH in patients on (abst) 216
effects of aluminum on calcium and parathyroid hormone in (abst) 583
glucose and lipid metabolism in (abst) 220
glucose metabolism in (abst) 98
multicentric study in Italy (abst) 99

protein-calorie malnutrition in (abst) 99
hemodialysis
acetate-induced myocardial depression during . 653
adrenergic dysfunction in hypotensive (abst) ...214
after onset of nephrotic syndrome.....177
and hemofiltration, cardiovascular response to (abst) 215
calcitonin levels in patients on (abst) 216
compared to hemofiltration and isolated ultrafiltration (abst).....215
compared with ultrafiltration and hemofiltration (abst).....214
effects of aluminum on calcium and parathyroid hormone in (abst).....583
hemochromatosis alleles and serum ferritin in (abst).....217
mechanism of, relative to leucopenia (abst) 215
protein-calorie malnutrition in (abst)..... 99
serum levels of vitamin B_{12} in (abst).....216
suppressor cells assayed in patients on 192
transfusion program during (abst) 218
in severe crescentic nephritis (abst) 581
intermittent peritoneal *d.*, affected by dipyridamole.....658
markers of hepatitis B virus in (abst) 217
membranes in anaphylactoid reactions (abst) 326
sequential hypertonic (abst) 215
Dialysis osteomalacia
response to 1,25$(OH)_2$ cholecalciferol (abst).....216
Dihydration
effects on hypertensive rats S-198
Dihydroxyvitamin D (abst) 96
Dimethyl sulfoxide
treatment for renal amyloidosis (abst) 327
Dipyridamole
effects on intermittent peritoneal dialysis 658
Diuretics
azosemide effects on peritoneal transport (abst) .. 97
furosemide delivery into urine 69
furosemide in congestive heart failure 171
in hypertension (abst)..... 95
secreted by proximal tubule 519
Dopaminergic system
effect on hypertension (abst) 214
Electrophysiology
in review of studies on nonmammalian nephrons . 560
Enzyme
converting, in angiotensin II formation S-49
in isolated proximal tubular brushborder membranes S-33
converting inhibitor (CEI), effects on renal function and tubuloglomerular activity.....S-114
orally converting inhibitor in nephropathic patients (abst) 97
Epidemiology
ischemic heart disease 304
kidney and urinary tract disease 63
Epithelioid cells
granular, in kidney of Atlantic salmon S-179
Erythrocytes
e. antibody inhibition assay in renal transplantation and pregnancy (abst) 582
Experimental kidney disease
chronic uremia..... 21
Familial nephropathy
analysis of 42 patients (abst)..... 98
Fibrosis
renal cortical interstitial *f.* in the rat (abst) 219
Fluorouracil
effects on renal failure (abst) 327
Folic acid
levels in chronic hemodialysis and hemofiltration (abst) 216
Follicle stimulating hormone
measured in hypogonadism in male hemodialysis patients (abst) 325
Forum on
acute hypophosphatemia 84
hypertension in chronic renal failure 702
mechanisms of urine concentration.....202
polycystic kidney disease 571
protein restriction in chronic renal failure 401
recurrent focal sclerosis after renal transplantation.....315
Fowl
renin-angiotensin system in.....S-185
Functional assays
monitoring suppressor T-cells in transplantation (abst) 95
Furosemide
effects on
congestive heart failure 171
GFR.....S-82
time course of delivery into urine 69
treatment in low-renin hypertension (abst) 409

Globulin
rabbit anti-human thymocyte, treatment for allograft rejections (abst).....409
Glomerular basement membrane
antibodies of, in severe crescentic nephritis (abst) 581
effects of human polymorphonuclear leucocytes on (abst).....584
interaction of cationized antigen with..... 27
Glomerular epithelial cells
in production of prostaglandins 355
Glomerular mesangium
and glomerular sclerosis after unilateral nephrectomy 338
Glomerular microcirculation
effects of distal salt delivery on S-109
Glomerular nephropathies
circulating immune complexes in (abst).....213
Glomerular permselectivity
altered in nephrectomized rats.....112
Glomerular polyanion
affected by Concanavalin A-activated cells in minimal change glomerulopathy (abst).....410
Glomerular pressure
and perfusate hypotonicity 234
Glomerular scarring
inhibited by diet (abst).....219
Glomerular sclerosis
global, renal argyria in (abst) 326
Glomerulonephritis
chronic, related to hypogonadism in hemodialysis (abst).....325
circulating immune complex in IgA *g.* (abst) 97
epimembranous, in mice (abst) 409
experimental, superimposed clip hypertension in . 257
hereditary, in study of familial nephropathy (abst) 98
immune complex..... 8

in vitro model exposed to human polymorphonuclear leucocytes (abst) 584
lobular membranoproliferative, associated with chronic lymphocytic leukemia (abst) 328
modified by diet (abst) 219
study of, in United Kingdom (abst) 218
use of plasma-exchange in (abst) 99
with isolated mesangial C3 deposition (abst) 213
Glomerulopathy
minimal change, Concanavalin A-activated cells in (abst) 410
Glomerulus
charge alterations in human minimal change nephropathy 677
clearance of, in immune complex glomerulonephritis 8
dynamics affected by pregnancy 608
dynamics in hydropenic pregnant rats (abst) 96
filtration rate
changes in early nephrotoxic acute renal failure in dog 162
differences in rat, dog, and man 136
effects of 1α-hydroxycholecalciferol on *GFR* in children with moderate renal failure (abst) ... 581
extraction of β2 microglobulin in dog 156
feedback regulation of *GFR* in denervated rat kidney S-129
in acute renal failure S-219
in mercuric chloride-induced acute renal failure (abst) 411
model of feedback control of S-143
proximal tubular pressure-mediated changes in S-193
regulation of single nephron *GFR* S-90
role of sodium chloride transport in S-82
tubuloglomerular feedback regulation of S-109
isolated, in vitro, in study of renin release S-73
Glucocorticoid
and mineralocorticoid deficiencies 587
Gluconeogenesis
role in acidosis 225
Glucose metabolism
during continuous ambulatory peritoneal dialysis (abst) 98, 220
Glutamic acid
transport of *g. a.* affected by brushborder membranes 240
Glutamine metabolism
affected by tricarboxylic acid 280
in acute renal failure 640
Glycerol
effects on angiotensin II in acute renal failure ... S-78
Gonadal function
and iron overload in hemodialysis (abst) 325
Goormaghtigh cells
role in GFR S-82
in juxtaglomerular apparatus of domestic fowl ... S-24
Granulocytes
in hemodialysis leucopenia (abst) 215

Haemaccel®
effects with phentolamine on induced acute renal failure in dog 162
Harmaline
effects on transport of glutamic acid 240
Heart failure
congestive, treated with furosemide 171
Hematuria
asymptomatic (abst) 219
idiopathic benign familial (abst) 98
Hemochromatosis
HLA typing and serum ferritin in (abst) 217
Hemodialysis
acetate-induced myocardial depression during 653
after onset of nephrotic syndrome 177
anaphylactoid reactions during (abst) 326
and hemofiltration, cardiovascular response to (abst) 215
and left atrial myxoma (abst) 327
associated with ischemic heart disease 304
calcitonin levels in hemodialysis patients (abst) ... 216
compared to hemofiltration and isolated ultrafiltration (abst) 215
compared with ultrafiltration and hemofiltration (abst) 214
effects of aluminum on calcium and parathyroid hormone in (abst) 583
effects of androgens in 383
hemochromatosis alleles and serum ferritin in (abst) 217
hypogonadism in (abst) 325
hypotensive, adrenergic dysfunction in (abst) 214
in leucopenia (abst) 215
iron overload and gonadal function in (abst) 325
protein-calorie malnutrition (abst) 99
quality of life study of 286
serum levels of vitamin B_{12} in (abst) 216
suppressor cells in patients on 192
transfusion program during (abst) 218
Hemodynamics
in unilateral nephrectomy 338
role in nephrotoxic acute renal failure 411
Hemofiltration
and hemodialysis, cardiovascular response to (abst) 215
and ultrafiltration compared to hemodialysis (abst) 214
compared with hemodialysis and isolated ultrafiltration (abst) 215
serum levels of vitamin B_{12} in (abst) 216
Hemolytic uremic syndrome
in children (abst) 583
Henoch-Schönlein purpura
plasmapheresis in (abst) 409
Hepatitis B virus
as markers in dialysis (abst) 217
associated with mesangiocapillary glomerulonephritis (abst) 326
effect of transfusion program on (abst) 218
Hepatocytes
in depletion of potassium 250
Histochemistry
of angiotensinase A in the glomerulus and the juxtaglomerular apparatus S-44
Homogenates, kidney
in estimation of renal kallikrein 697
Hydraulic conductance
affected by vasopressin 360
Hydronephrosis
pyelography and needle nephrostomy in (abst) ... 411

Hydropenia
in pregnant rats (abst) 96
Hypercalciuria syndrome
dietary sodium in 292
Hyperglycemia
effects on tubuloglomerular feedback activity ... S-206
Hyperparathyroidism
calcium metabolism after parathyroidectomy in (abst) 95
magnesium tubular reabsorption in (abst) 96
parathyroid function in post-transplant *h.* 662
secondary, in children with chronic renal failure . 583
Hyperphosphatemia
effect on nephrocalcinosis after chemotherapy for leukemia (abst) 325
Hyperplasia
in juxtaglomerular apparatus of human kidney ... S-18
Hypertension
dopaminergic system in (abst) 214
experimental, in rats with bilaterally constricted renal arteries S-198
in chronic renal disease, forum on 702
measurement of vascular resistances in rats with (abst) 410
renin-dependent in nephropathic patients (abst) ... 97
sodium-potassium transport system in (abst) 214
superimposed clip, in glomerulonephritis 257
treated with
captopril (abst) 98
diuretics (abst) 95
indapamide (abst) 96
converting enzyme inhibitor in (abst) 97
Hypertensive diseases
juxtaglomerular cell complex in S-18
Hypertrophy
induced by nephrectomy 398
Hypogonadism
in male hemodialysis patients (abst) 325
Hypokalemic rhabdomyolysis
associated with acute renal failure (abst) 325
Hypophosphatemia
acute, forum on 84
Hypotension
in dialysis (abst) 215
Hypothalamic-pituitary-adrenal axis
prognostic value in nephropathy (abst) 213
Hypovolemic diseases
juxtaglomerular cell complex in S-18

Immune complex
circulating
detection techniques of (abst) 213
in IgA glomerulonephritis (abst) 97
glomerulonephritis 8
IgA and IgG in IgA nephropathy (abst) 213
in epimembranous glomerulonephritis (abst) 409
in situ formation 27
Immunity
cellular and humoral, in kidney transplant recipients (abst) 410
Immunocytochemistry
of renin-angiotensin system S-33
Immunofluorescence test
in epimembranous glomerulonephritis (abst) 409
indirect, used in hepatitis B virus mesangiocapillary glomerulonephritis (abst) 326
Immunoglobulin A
circulating immune complexes in Henoch-Schönlein purpura and primary IgA nephropathy (abst) 409
mesangial deposits, recurrence in anaphylactoid purpura nephritis (abst) 326
polymeric synthesis in IgA nephropathy (abst) ... 213
Immunoglobulin A glomerulonephritis
circulating immune complex in (abst) 97
Immunoglobulin A nephropathy
associated with HLA-DR4 antigen, in Japan 377
IgA and IgG immune complexes in (abst) 213
immunological tubulo-interstitial deposits in 184
multicenter study on children with 643
plasmapheresis in (abst) 409
polymeric IgA synthesis in (abst) 213
study in northeast Scotland (abst) 212
Immunoglobulin G
and IgA immune complexes in IgA nephropathy (abst) 213
Immunological tubular damage in IgA nephropathy . 184
Immunoreactivity
measured in angiotensin II S-49
Immunosuppression
treatment in crescentic nephritis (abst) 581
Indapamide
effects on hypertension (abst) 96
Indium-111-labeled platelets
in diagnosis of kidney allograft rejection (abst) ... 218
Indomethacin
effects on interstitial fluid pressure in contralateral nephrectomy S-122
effects on proteinuria, renin-angiotensin-aldosterone axis, and urinary prostaglandin E_2 in nephrotic syndrome (abst) 213
in uremia 272
treatment of chronic experimental nephrosis (abst) 326
Insulin
glucose metabolism in continuous ambulatory peritoneal dialysis (abst) 98
resistance in uremia 54
^{125}I-insulin
removal of, from rat kidney peritubular circulation 220
Intermittent peritoneal dialysis (IPD)
clearance of PTH in (abst) 216
Interstitium, renal
function of S-122
Inulin clearance
affected by dipyridamole in intermittent peritoneal dialysis 658
Ions
transport
associated with renal tubule secretion and reabsorption of fluid 519
by cortical and outer medullary collecting tubule 473
of inorganic *i.* in isolated perfused renal tubules 560
Iron
overload and gonadal function in hemodialysis (abst) 325
Ischemia
heart disease, associated with hemodialysis 304

membrane defects induced by (abst) 411
renal injury, recovery from 13
Isoproterenol
effects on connecting tubules 465

Juxtaglomerular apparatus
and angiotensinase A, histochemistry of S-44
and perfusate hypotonicity 234
correlation between structure and function in human kidney S-18
in domestic fowl S-24
introduction to Supplement No. 12 on S-1
renin activity in S-55, S-67
Juxtaglomerular cell complex
in hypertensive diseases S-18
in hypovolemic diseases S-18
Juxtaglomerular epithelioid cells
coexistence of angiotensin II immunoreactivity with renin in S-30
Juxtaglomerular myoepithelioid and peripolar cells
ultrastructural morphology of granular release from S-3
Juxtamedullary nephrons
tubuloglomerular feedback in S-104

Kallikrein
activity and inter-relationships with renin-angiotensin-aldosterone and prostaglandin systems .. 594
estimated by amidolytic activity in kidney homogenates 697
localization of, in microdissected rabbit nephron . 602
of isolated basolateral membrane of rat kidney ... 331
Keotacid
amino acid supplement in chronic renal failure ... 48
Kininogenase activity
in microdissected nephron 613

Leucocytes
human polymorphonuclear, effects on glomerulonephritis (abst) 584
Leucopenia
dialysis-induced (abst) 215
hemodialysis-related (abst) 215
Leukemia
acute lymphoblastic, related to nephrocalcinosis (abst) 325
chronic lymphocytic, associated with lobular membranoproliferative glomerulonephritis (abst) 328
cytotoxic antibodies in chronic lymphocytic *l.* (abst) 217
Limb of Henle's loop
thick ascending, role of 454
transport characteristics of 449
Lipids
APRL or PAF-acether in the rat (abst) 214
and glucose metabolism in continuous ambulatory peritoneal dialysis (abst) 220
in transplantation 42
Liver disease
with polycystic kidney disease in Springbok 146
Loops of Henle
affected by peristalsis in pelvic wall 613

Luteinizing hormone
measured in hypogonadism in male hemodialysis patients (abst) 325
response of ovarian cyclic AMP to 272
Lymph
in estimates of interstitial fluid pressure and protein concentration S-122
Lymphocytes
in minimal change nephropathy (abst) 581
suppressive effect of peripheral blood mononuclears on 192
type B antibodies in renal transplantation and pregnancy (abst) 582
Lymphoid cells
circulating, in IgA nephropathy (abst) 220

Macula densa
cells
in transport of sodium or chloride S-90
variability of intercellular spaces between S-9
feedback
and perfusate hypotonicity 234
as mediator of renal autoregulation S-157
as mediator of renal blood flow S-165
in juxtaglomerular apparatus of domestic fowl ... S-24
Magnesium
in microperfusion of loop of Henle 634
transport in isolated renal tubules 492
tubular reabsorption in primary hyperparathyroidism (abst) 96
Mathematics
approach to renal compensatory hypertrophy after nephrectomy 398
Membranous nephropathy
in human renal allografts 177
Mercuric chloride
acute renal failure induced by (abst) 411
Mesangial cells
in production of prostaglandins 355
Mesangiocapillary
glomerulonephritis, associated with hepatitis B virus (abst) 326
Metabolic acidosis
chronic, arterial P_{CO_2} in 311
effects on renal brushborder membrane vesicles .. 225
kidney of chicken adapts to 103
parathyroid hormone in 264
Microcalorimetry
in isolated perfused nephron segments 507
β2 microglobulin in dog kidney 156
Microperfusion
development of 417
in isolated tubule, used to study renal disease 536
in loop of Henle 634
in vitro
in examination of limbs of Henle's loop 449
proximal convoluted tubules 425
of isolated nephron segments 485
orthograde and retrograde, in evaluation of tubuloglomerular feedback S-97
Micropuncture study of
juxtamedullary nephrons S-104
effects of acute renal denervation on tubuloglomerular feedback S-129
effects of pregnancy on glomerular dynamics 608
renal function in cirrhotic rats (abst) 212

renin in circulation of the cat S-63
used to measure vascular resistances in isolated perfused rat kidneys (abst) 410
Mineralocorticoid
and glucocorticoid deficiencies 587
Minoxidil
effects on hypertensive rats S-198
Mitochondria
affected by pyruvate 280
Mitogens
effects on lymphocytes in minimal change nephropathy (abst) 581
Mitomycin C
effects on renal failure (abst) 327
Monoclonal antibodies
monitoring suppressor T-cells in transplantation (abst) 95
Myocardial depression
acetate-induced during hemodialysis 653
Myoepithelioid cells
of the juxtaglomerular apparatus S-3
Myogenic mechanism
role in renal autoregulation S-165
Myohemoglobinuria
model of glycerol-induced *m.* in rats S-78
Myxoma
left atrial, reno-vascular complications in (abst) ... 327

N-acetylglucosaminidase urinary activity
in nephrotic syndrome in children (abst) 581
N-(3,5-dichlorophenyl)
succinimide
in chronic cortical tubulointerstitial nephritis (abst) 219
Natriuresis
in congestive heart failure 171
Necrosis
unilateral cortical *n.* in volume expansion (abst) . 212
Nephrectomy
altered glomerular permselectivity and progressive sclerosis after 112
compensatory hypertrophy after 398
in very young children (abst) 582
unilateral
effects on tubuloglomerular feedback S-122
glomerular sclerosis after 338
Nephritis
anaphylactoid purpura, and transplantation (abst) 326
chronic cortical tubulointerstitial (abst) 219
effects of Cyclosporin A on acute serum sickness *n.* (abst) 582
nephrotoxic, modified by diet (abst) 219
severe crescentic, dialysis in (abst) 581
Nephrocalcinosis
induced by hyperphosphatemia (abst) 325
prevention of 36
Nephrolithiasis
triamterene-induced (abst) 327
uric acid, pathogenesis and clinical course of 366
Nephromegaly
in Springbok 146
Nephrons
filtration rate differences in rat, dog, and man ... 136
isolated fragments in study of distal convoluted and connecting tubules 465
localization of kallikrein in 602
obstruction of, in tubuloglomerular feedback .. S-213
review of studies on nonmammalian *n.* 560
segments, ontogeny in 550
superficial and deep, response to volume expansion in rats (abst) 212
Nephropathy
minimal change, effects of mitogens on lymphocytes in (abst) 581
Nephrosclerosis
juxtaglomerular apparatus of human kidney in .. S-18
Nephrosis
chronic experimental, treated with indomethacin (abst) 326
Nephrostomy
needle, and percutaneous antegrade (abst) 411
Nephrotic syndrome

Table of contents

LABORATORY INVESTIGATION

Prostaglandin synthesis inhibition during volume expansion: Collecting duct function. *Douglas R. Wilson, Ursula Honrath, and Harald Sonnenberg* 1

Impairment of glomerular clearance of macroaggregates in immune complex glomerulonephritis. *Zeev Sharon, Melvin M. Schwartz, Benedicht U. Pauli, and Edmund J. Lewis* 8

Accelerated recovery of single nephron function by the postischemic infusion of ATP-$MgCl_2$. *Karen M. Gaudio, Marcia R. Taylor, Irshad H. Chaudry, Michael Kashgarian, and Norman J. Siegel* 13

Calcemic and phosphaturic response to parathyroid hormone in normal and chronically uremic dogs. *Allan I. Jacob, George Gavellas, J net Canterbury, and Jacques J. Bourgoignie* 21

Interaction of cationized antigen with rat glomerular basement membrane: In situ immune complex formation. *Arnold Vogt, Rolf Rohrbach, Fujio Shimizu, Haruo Takamiya, and Stephen Batsford* 27

Prevention of phosphate-induced progression of uremia in rats by 3-phosphocitric acid. *Luis Gimenez, W. Gordon Walker, William P. Tew, and Judith A. Hermann* 36

CLINICAL INVESTIGATION

Effect of alternate-day prednisone on plasma lipids in renal transplant recipients. *John J. Curtis, John H. Galla, Susan Y. Woodford, Bruce A. Lucas, and Robert G. Luke* 42

Long-term effects of a new ketoacid–amino acid supplement in patients with chronic renal failure. *William E. Mitch, Elias Abras, and Mackenzie Walser* 48

Insulin resistance in uremia mediated by postbinding defects. *Douglas Smith and Ralph A. DeFronzo* 54

The frequency of kidney and urinary tract diseases in a defined population. *Robert A. Hiatt and Gary D. Friedman* 63

The time course of delivery of furosemide into urine: An independent determinant of overall response. *Sming Kaojarern, Bart Day, and D. Craig Brater* 69

TECHNICAL NOTE

Improved techniques for acute and chronic cannulation of renal artery in the rat. *Jaime S. Carvalho* 75

Quantitative spectrophotometric assay of renal tissue plasminogen activator. *Nisan Gilboa, Janice Erdman, and Rodrigo E. Urizar* 80

NEPHROLOGY FORUM

Acute hypophosphatemia. *Eberhard Ritz* 84

Table of contents

LABORATORY INVESTIGATION

The kidney of chicken adapts to chronic metabolic acidosis: In vivo and in vitro studies. *André G. Craan, Guy Lemieux, Patrick Vinay, and André Gougoux* 103

Altered glomerular permselectivity and progressive sclerosis following extreme ablation of renal mass. *Jean L. Olson, Thomas H. Hostetter, Helmut G. Rennke, Barry M. Brenner, and Manjeri A. Venkatachalam* 112

Glomerular charge and urinary protein excretion: Effects of systemic and intrarenal polycation infusion in the rat. *V. Matti Vehaskari, Edward R. Root, Frederick G. Germuth, Jr., and Alan M. Robson* 127

An analysis of glomerular dynamics in rat, dog, and man. *Donald E. Oken* 136

Polycystic kidney and liver disease in Springbok: I. Morphology of the lesions. *William O. Iverson, George H. Fetterman, Elliott R. Jacobson, John H. Olsen, David F. Senior, and Earl E. Schobert.* 146

The renal handling of beta$_2$-microglobulin in the dog. *Philip W. Hall, III, Moon Chung-Park, Christina V. Vacca, Michael London, and Andrea Q. Crowley* 156

Dissociation of glomerular filtration and renal blood flow in $HgCl_2$-induced acute renal failure. *Raymond C. Vanholder, Marleen M. Praet, Piet A. Pattyn, Isidoor R. Leusen, and Norbert H. Lameire* 162

CLINICAL INVESTIGATION

Absorption and disposition of furosemide in congestive heart failure. *D. Craig Brater, Ruth Seiwell, Shirley Anderson, Ann Burdette, Gregory J. Dehmer, and Polavat Chennavasin* 171

De novo membranous nephropathy in human renal allografts: Report of nine patients. *Jean-Pierre Cosyns, Yves Pirson, Jean-Paul Squifflet, Guy P. J. Alexandre, Charles van Ypersele de Strihou, Vivian W. Pinn, Stephen J. Sweet, Kenneth S. Shapiro, Sang Cho, and John T. Harrington* 177

Immunological tubulo-interstitial deposits in IgA nephropathy. *Giovanni M. Frascà, Alba Vangelista, Graziella Biagini, and Vittorio Bonomini* 184

Suppressor cells assayed by numerical and functional tests in chronic renal failure. *Jennifer E. Lortan, Photini Kiepiela, Hoosen M. Coovadia, and Yackoob K. Seedat* 192

TECHNICAL NOTE

A rapid ultrastructural embedding procedure for renal biopsy tissue. *Robert P. Swain, Patricia A. Pilia, and Sterling K. Ainsworth* 198

NEPHROLOGY FORUM

Mechanisms of urine concentration. *Robert W. Berliner* 202

ABSTRACTS

Table of contents

LABORATORY INVESTIGATION

Effect of metabolic acidosis on renal brushborder membrane adaptation to low phosphorus diet. *Stephen A. Kempson* 225

Relationship between tubulo-glomerular feedback responses and perfusate hypotonicity. *P. Darwin Bell and L. Gabriel Navar* 234

Surface properties of kidney brushborder membranes affecting the transport of glutamic acid. *Barry B. Kirschbaum* 240

Element concentrations of renal and hepatic cells under potassium depletion. *Franz Beck, Adolf Dörge, June Mason, Roger Rick, and Klaus Thurau* 250

Aggravation of experimental glomerulonephritis by superimposed clip hypertension. *Joel Neugarten, Helen D. Feiner, Robert G. Schacht, Gloria R. Gallo, and David S. Baldwin* 257

Parathyroid hormone is not anticalciuric during chronic metabolic acidosis. *Daniel Batlle, Kriengsak Itsarayoungyuen, Steven Hays, Jose A. L. Arruda, and Neil A. Kurtzman* 264

Diminished response of ovarian cAMP to luteinizing hormone in experimental uremia. *Wilhelm Kreusser, Hermann Mader, Wolf-Dietrich Haag, and Eberhard Ritz* 272

Influence of pyruvate on ammonia metabolism by renal cortical mitochondria. *Richard L. Tannen and Arthur S. Kunin* 280

CLINICAL INVESTIGATION

The quality of life of hemodialysis and transplant patients. *John P. Johnson, Clark R. McCauley, and John B. Copley* 286

Importance of dietary sodium in the hypercalciuria syndrome. *Francis Peter Muldowney, Rosemarie Freaney, and Mary Frances Moloney* 292

Enhanced cardiovascular pressor reactivity to norepinephrine in mild renal parenchymal disease. *Carlo Beretta-Piccoli, Peter Weidmann, Helmut Schiffl, Christoph Cottier, and François C. Reubi* 297

Relationship of coronary risk factors to hemodialysis-associated ischemic heart disease. *Stephen G. Rostand, Katharine A. Kirk, and Edwin A. Rutsky* 304

TECHNICAL NOTES

Preparation of renal autotransplants in sheep. *R. Douglas Wright, Kenneth J. Hardy, Simon J. Potocnik, and John G. McDougall* 309

Arterial P_{CO_2} in chronic metabolic acidosis. *David A. Bushinsky, Fredric L. Coe, Charles Katzenberg, J. Peter Szidon, and Joan H. Parks* 311

NEPHROLOGY FORUM

Recurrent focal sclerosis after renal transplantation. *Edmund J. Lewis* 315

Table of contents

LABORATORY INVESTIGATION

Kallikrein and prekallikrein of the isolated basolateral membrane of rat kidney. *Kenichi Yamada and Ervin G. Erdös* 331

Mesangial function and glomerular sclerosis in rats after unilateral nephrectomy. *Joris Grond, Marten S. Schilthuis, Jan Koudstaal, and Job D. Elema* 338

The effect of water deprivation on the osmotic release of renin. *Jaime S. Carvalho* 344

Action of phosphorus on calcium release in isolated perfused rat tails. *Peter J. Somerville and Michael Kaye* 348

Prostaglandin production by homogeneous cultures of rat glomerular epithelial and mesangial cells. *Jeffrey I. Kreisberg, Morris J. Karnovsky, and Lawrence Levine* 355

Functional differentiation of the medullary collecting tubule: Influence of vasopressin. *Michael F. Horster and Hans Zink* 360

CLINICAL INVESTIGATION

Pathogenesis and clinical course of mixed calcium oxalate and uric acid nephrolithiasis. *Stephanie Millman, Amy L. Strauss, Joan H. Parks, and Fredric L. Coe* 366

Effects of dietary protein and phosphorus restriction on the progression of early renal failure. *Giuseppe Maschio, Lamberto Oldrizzi, Nicola Tessitore, Angela D'Angelo, Enrico Valvo, Antonio Lupo, Carmelo Loschiavo, Antonia Fabris, Linda Gammaro, Carlo Rugiu, and Giovanni Panzetta* 371

Strong association between IgA nephropathy and HLA-DR4 antigen. *Hidehiko Kashiwabara, Hideo Shishido, Shigeo Tomura, Hiroki Tuchida, and Tetsuya Miyajima* 377

Correlation of clinical and in vitro erythropoietic responses to androgens in renal failure. *Maria Kalmanti, Nicholas Dainiak, Joseph Martino, Maureen Dewey, Vivek Kulkarni, and Donald Howard* 383

Nitrogen utilization in uremic patients fed by continuous nasogastric infusion. *Elias Abras and Mackenzie Walser* 392

TECHNICAL NOTE

Pattern of renal growth and compensatory hypertrophy during development in rats: A mathematical approach. *László Hársing, Károly Baranyi, and Elek Pósch* 398

NEPHROLOGY FORUM

Protein restriction in chronic renal failure. *Carmelo Giordano* 401

Introduction: Background and development of microperfusion technique. *Maurice B. Burg* 417

TRANSPORT CHARACTERISTICS OF NEPHRON SEGMENTS

Transport characteristics of in vitro perfused proximal convoluted tubules. *Harry R. Jacobson* . 425

The study of pars recta function by the perfusion of isolated tubule segments. *James A. Schafer and Delon W. Barfuss* 434

Transport characteristics of the thin limbs of Henle. *Juha P. Kokko* 449

Thick ascending limb of Henle's loop. *Maurice B. Burg* 454

Function of distal convoluted and connecting tubules studied by isolated nephron fragments. *Masashi Imai and Ryuichi Nakamura* 465

Ion transport by the cortical and outer medullary collecting tubule. *John B. Stokes* 473

Water, urea, sodium, chloride, and potassium transport in the in vitro isolated perfused papillary collecting duct. *Antonino S. Rocha and Lucia H. Kudo* 485

PHYSIOLOGIC PERSPECTIVES FROM ISOLATED TUBULE STUDIES

Divalent cation transport in isolated tubules. *Roland C. K. Ng, Robert A. Peraino, and Wadi N. Suki* 492

Divalent anion transport in isolated renal tubules. *Vincent W. Dennis and Peter C. Brazy* 498

Acidification in the in vitro perfused tubule. *Christine A. Berry and David G. Warnock* 507

Studies of organic anion and cation transport in isolated segments of proximal tubules. *Jared J. Grantham* 519

Water movement across the mammalian cortical collecting duct. *Steven C. Hebert and Thomas E. Andreoli* 526

Studies on acute disease models. *Michael J. Hanley* 536

Adaptation of renal tubule in uremia. *Leon G. Fine* 546

Expression of ontogeny in individual nephron segments. *Michael Horster* 550

Studies on nonmammalian nephrons. *William H. Dantzler* 560

NEPHROLOGY FORUM

Polycystic kidney disease. *Wadi N. Suki* 571

ABSTRACTS

The Renal Association Meeting, London, England, May 26, 1982 581

ANNOUNCEMENTS 585

KIDNEY INTERNATIONAL

Volume 22, Number 6, December 1982

Official Journal of the International Society of Nephrology

Le Journal de la Société Internationale de Néphrologie

Table of contents

LABORATORY INVESTIGATION

Effect of arginine vasopressin antagonist on renal water excretion in glucocorticoid and mineralocorticoid deficient rats. *San-e Ishikawa and Robert W. Schrier* 587

Developmental aspects of the renal kallikrein-like activity in fetal and newborn lambs. *Jean E. Robillard, William J. Lawton, Douglas N. Weismann, and Christine Sessions* 594

Localization of active and inactive kallikrein (kininogenase activity) in the microdissected rabbit nephron. *Ken Omata, Oscar A. Carretero, A. Guillermo Scicli, and Brian A. Jackson* 602

Effects of pregnancy on glomerular dynamics: Micropuncture study in the rat. *Antonio Dal Canton. Giuseppe Conte, Ciro Esposito, Giorgio Fuiano, Raffaele Guasco, Domenico Russo, Massimo Sabbatini, Francesco Uccello, and Vittorio E. Andreucci* 608

Changes in fluid compartments in hamster renal papilla due to peristalsis in the pelvic wall. *Bodil Schmidt-Nielsen and Bruce Graves* 613

Amphotericin B nephrotoxicity: Increased renal resistance and tubule permeability. *Jen-Tse Cheng, Robert T. Witty, Roscoe R. Robinson, and William E. Yarger* 626

Flow-correlated influx of K, Ca, P, and Mg during continuous microperfusion of the loop of Henle in the rat. *David Z. Levine, Nicole Roinel, and Christian de Rouffignac* 634

Renal metabolism of glutamine in rats with acute renal failure. *Norma McFarlane Anderson, Paloma Hortelano, and George A. O. Alleyne* 640

CLINICAL INVESTIGATION

A multicenter study of IgA nephropathy in children. A report of the Southwest Pediatric Nephrology Study Group 643

Acetate-induced myocardial depression during hemodialysis for acute renal failure. *Jean-Louis Vincent, Jean-Louis Vanherweghem, Jean-Paul Degaute, Jacques Berré, Philippe Dufaye, and Robert J. Kahn* 653

Augmentation of peritoneal clearance by dipyridamole. *Jack Rubin, Catherine Adair, Tom Barnes, and John D. Bower* 658

Parathyroid function in persistent hyperparathyroidism: Relationship to gland size. *David A. McCarron, Richard S. Muther, Barbara Lenfesty, and William M. Bennett* 662

Entrapment of anti-DNA antibodies in the kidney of patients with systemic lupus erythematosus. *Akira Yamada, Yuzo Miyakawa, and Kinori Kosaka* 671

Glomerular charge alterations in human minimal change nephropathy. *Charles R. Bridges, Bryan D. Myers, Barry M. Brenner, and William M. Deen* 677

An analysis of the United States renal transplant patient population and organ survival characteristics: 1977 to 1980. *Steven J. Rosansky and Tai Sugimoto* 685

TECHNICAL NOTES

Flow-induced errors in estimating perfusion pressure of the isolated rat kidney. *Rodger Loutzenhiser, Charles Horton, and Murray Epstein* 693

The measurement of amidolytic activity in kidney homogenates for the estimation of renal kallikrein. *Marcos Marin-Grez and Gaston Schaechtelin* 697

NEPHROLOGY FORUM

Hypertension in chronic renal disease. *Jaime Herrera Acosta* 702
